Not illustrated. 1892 Excerpt: .It is usually in the form of calcium sulphate, or gypsum. Chlorin is found only sparingly in soils, and is usually in the form of common salt. Value of a Chemical Soil Analysis. It has become very evident from correspondence and conversation with parties interested in the relation of soils to agricultural and horticultural interests, that the prevailing idea concerning the real value and meaning of a chemical soil analysis is far from being the correct one. Therefore, it seems best at this point to outline, as clearly as possible, the true importance to be attached to such an analysis. Agriculture, as a science, is of comparatively recent date. As recently as 1830 it was still an unsolved problem whether or not mineral matter was necessary to the life of the plant. Since that time the ideas concerning the relation between the plant and the soil in which it grows have been varied and conflicting, always governed and modified by the theories of the time. Real scientific agriculture only dates back about thirty-three years, when Liebig first discovered the true philosophy of plant nutrition. His discovery was not made until he had learned by bitter experience that theories, however plausible, are often disproved by practical tests. Liebig s examination of plants from many portions of the world was very productive of results. He found that all plants contained the same ash constituents, although varying in proportion for different plants. From this he argued that all plants...
