Mathematical Questions and Solutions Volume 54

By Books Group

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 Excerpt: .inverse of the given curve with respect to the origin. If the chord of curvature through the pole be kr, it will be found that $dp/ds = (4-1) \cot \theta$ (when S lies on OP), whence $r = xp^2/1-p^2$. $r^2 = a^2 - p^2$ will be the equation for a curve such that the locus of the pole of the osculating spiral is the inverse, with respect to the circle $r = b^2/a$, of the curve. If the constant term in this equation be omitted, it is the equation between r and p for the spiral. Perhaps the equation would be better, written in the form $r = a^2/(1-p^2) + 42$, since $k = 2$ (the equiangular spiral) would give $r^2 = p^2 + 42$, or the involute of a circle which is only a particular case. If we put $k = 2$, the osculating curve is the rectangular hyperbola,...

Reviews

Completely essential read book. It is one of the most remarkable publication i have got study. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- *Santina Bogan*

This pdf is great. I am quite late in start reading this one, but better then never. I am effortlessly can get a delight of looking at a composed publication.
