Brand New Book ***** Print on Demand *****.Excerpt from Medical Education in America: Being the Annual Address Read Before the Massachusetts Medical Society, June 7, 1871 Having on former occasions said something of Medical Science and Medical Art, I propose here to offer a few practical considerations on Medical Education, with reference both to its daily use and to the progress of medical knowledge. I am well aware that he who inculcates in general terms a high standard of knowledge, and bids God-speed to progress, has a far more grateful task, in the approval of others, and possibly of himself, than he who stops to direct or limit it by any considerations of its relative utility. But in an age of science, like the present, there is more danger that the average medical student will be drawn from what is practical, useful, and even essential, by the well-meant enthusiasm of the votaries of less applicable sciences, than that he will suffer from want of knowledge of these; and I am quite aware that I may not hope for the favorable consideration of some of my friends, when I say, that, if there is any idea which I particularly desire to present distinctly in these remarks, it is that of utility in medical education.
