

Electron-Molecule Scattering and Photoionization

Filesize: 4.09 MB

Reviews

This published publication is fantastic. it had been writtern very perfectly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Junius Herman)

ELECTRON-MOLECULE SCATTERING AND PHOTOIONIZATION

[DOWNLOAD PDF](#)

Springer-Verlag New York Inc., United States, 2011. Paperback. Book Condition: New. Softcover Reprint of the Orig ed.. 244 x 170 mm. Language: English . Brand New Book ***** Print on Demand *****. This volume contains the invited papers and selected contributed papers presented at the International Symposium on Electron-Molecule Scattering and Photoionization held at SERC's Daresbury Laboratory, Cheshire, England from 18th to 19th July, 1987. This Symposium was a Satellite Meeting to the XVth International Conference on the Physics of Electronic and Atomic Collisions (ICPEAC I) and follows a tradition of Satellite Meetings in related areas of collisions held in association with previous ICPEAC's. In order to make this volume as representative of the Symposium as possible Hot Topics presented orally at the meeting together with a few papers selected by the Programme Committee from the contributed posters are included. The Editors are grateful to the authors for responding rapidly to the invitation to submit their contributions for inclusion in the volume, as indeed they are grateful to all the authors for the high quality of their contributions. The Symposium brought together over 100 scientists from many countries and from broad interdisciplinary backgrounds to hear about current rapid advances in electron-molecule scattering and photoionization. These advances have been stimulated on the experimental side by the increasing availability of electron beams with millivolt energy resolution, by synchrotron radiation sources and by intense tunable lasers. On the theoretical side the introduction of new computational methods enables accurate predictions to be made, resulting in a new and deeper understanding of the basic physical processes involved.
