Could a single cosmic event have caused Noah's flood, continental drift, Earth's broken terrain, and the even the moon's crater's? Here, 200+ pages of evidence from a variety of sources supports that premise. The author takes a hard look at Earth's mountains, oceans, and legends, approaching the topic as an engineer and follower of Christ. Both faith and facts are considered, while presenting a plausible explanation for the biggest natural disaster in the history of the world. Here are facts supporting: - Noah's faith and obedience from more than one historical account - Arrival of a second moon prior to the flood - A globally violent event from multiple historical accounts - Copious amounts of ice and water from space - Giant humans and other creatures before the flood - A dozen scientific methods for determining the flood date - An asteroid embedded 1200 kilometers deep in the earth - An exact location of ground zero - The best video and satellite evidence for the location of Noah's Ark - Evidence that the appearance of our current moon changed at that time - A 1900 foot long skeleton belonging to the sea serpent Leviathan - What the calendar may have looked like before the flood.
