Complete Math Review for the Pharmacy Technician (4th Revised edition)

By William A Hopkins

American Pharmacists Association. Paperback. Book Condition: new. BRAND NEW, Complete Math Review for the Pharmacy Technician (4th Revised edition), William A Hopkins, Complete Math Review for the Pharmacy Technician provides a friendly, self-instructional approach to lifelong understanding of pharmacy calculations. Filled with real-world practice problems and the author's good humor and encouragement, the book is a unique training resource, whether for the classroom, the national Pharmacy Technician Certification Examination, or the pharmacy practice setting. It thoroughly covers every topic related to pharmacy calculations that a pharmacy technician needs to know. It comes with more than 100 advance practice questions new to the 4th edition, the book contains more than 850 practice problems spread throughout its 13 chapters, with answer keys and problem solutions in the back. The edition includes "The PI Challenge," which contains more than 75 questions challenging the reader's ability to interpret information that is taken directly from actual pharmaceutical product package inserts. A chapter titled "Medication Errors and Clinical Challenges" tests the reader's ability to recognize medication calculation errors sometimes made by nurses, pharmacists, and physicians. The book concludes with a 101-question "post-test." Each question is about a real-world problem a technician might encounter in pharmacy practice....
